

Florida Fish and Wildlife Conservation Commission Meeting
December 5, 2023
Comments Provided In-person
By: Sarah Gledhill, President and CEO

Chairman Barreto, Commissioners, and Executive Director Young:

My name is Sarah Gledhill. I am the President and CEO of the Florida Wildlife Federation, a statewide nonprofit organization with a mission to conserve Florida's wildlife, habitats, and natural resources through education, advocacy, and science-based stewardship.

I want to first express our appreciation to you, the Commissioners, and the FWC staff who dedicate their careers and time to managing over 6 million acres in established wildlife and environmental management areas across the state. As an organization that represents Floridians who recreate on these lands in a variety of ways from fishing, hunting, birdwatching, and hiking, we value these wildlife management areas. To truly experience public lands that are quiet, rugged terrain, and embody old Florida, our state's wildlife management areas provide this sought-after experience. Thank you for managing these resources for the public to enjoy but most importantly for the wildlife we share it with.

Here we are today, to listen, comment, and discuss an agenda item regarding the release of a perpetual conservation easement on one of those wildlife management areas - Split Oak Forest Wildlife and Environmental Area.

The Florida Wildlife Federation has opposed this project in other stages of the process. In April 2022, we provided public comment during the Florida Communities Trust governing board meeting and asked the members to reject it. Regrettably, after hours of public comment, they approved the request leading us to this point.

I am here today asking you to reject the release of the conservation easement. To some, this may be perceived as a local issue. It is not a local issue, this is an issue of statewide significance. If you approve the release of the conservation easement, lands across the state currently encumbered by a conservation easement can be transferred to uses incompatible with conservation, recreation, and wildlife.

In addition, I present to you the signatures of 954 of our members and supporters who love our public lands and urge you to reject the request. People across the state are watching this decision and are very concerned about how a vote in favor of a release will set the stage for other "requests to release a conservation easement." Please reject this proposal and vote no.

Thank you for your time.

Support Split Oak Forest Wildlife and Environmental Area

We, the undersigned, request that the Florida Fish and Wildlife Conservation Commission (FWC) reject the request to release the conservation easement for a portion of Split Oak Forest Wildlife and Environmental Area to allow a toll highway and facility to bisect the public resource.

Managed by Orange and Osceola Counties in partnership with FWC, Split Oak Forest is a conservation area of significance. The 1,689-acre area is protected by multiple conservation easements held by various agencies and most of the forest has been used to mitigate development. As a dedicated recipient site, Split Oak Forest is also the home to a significant population of gopher tortoises translocated in the 1990s and 2000s - and more than 360 commensal species.

The release of the conservation easement and subsequent proposed highway would:

- Directly undermine the management objective of Split Oak Forest to "restore and maintain the habitats critical to the long-term benefit of state and federally listed upland species, particularly the gopher tortoise."
- Fragment Split Oak Forest and limit the use of prescribed fire as a habitat restoration and management tool.
- Set a precedent allowing lands protected and managed for conservation to be transferred to uses incompatible with conservation and wildlife protection.

There is broad community opposition to the proposed highway project. Orange County - which has recently ceased its support of the project -- passed a referendum in November 2020, with 86.4% of citizens voting to include protections for Split Oak Forest in their County Charter.

FWC has done a commendable job managing Split Oak Forest, and as a managing partner holding perpetual conservation easements over the conservation area, has an obligation to the public to protect the site from incompatible uses.

Please do not release the conservation easement at Split Oak Forest Wildlife and Environmental Area and uphold your duty to the public by protecting this significant wildlife habitat from development.
