Introduction – UF/IFAS Extension

For over 100 years, Extension Offices around the country have been providing information to improve the lives of those in their community.

The UF/IFAS Extension Leon County office provides research-based technical assistance and educational resources from the University of Florida and Florida Agricultural and Mechanical University to Leon County citizens.

Learning Objectives

- Introduction
- Types of Pollinators
- Benefits of Pollinators
- Threats Facing Pollinators
- Pollinator Best Practices
- Pollinator Plant Examples

Power of Pollinators

Threats Facing Pollinators

Area of primary forests in the United States (lower 48)
(around 1620, top; and 1850 middle; 1920, bottom)

Power of Pollinators

Threats Facing Pollinators

Power of Pollinators

Pollinator Best Practices

We can individually and collectively make a difference through our gardens.

Power of Pollinators

Pollinator Best Practices

- Ways to Attract Wildlife (from Florida-Friendly Landscaping Program)
 - Provide food (with plants) – water – shelter – space to raise young
 - Plant a diversity of species
 - Plan for a diversity of vertical layers
 - Take it easy on the pesticides
- Don't forget dead stuff – twigs, branches, snags, leaves

Power of Pollinators

Pollinator Plant Examples

- Plants with abundant and accessible pollen and nectar
- Plants with clusters of flowers
- Plants with flat flowers with various-length flower tubes (corollas)
 - Many native wild bees have relatively short proboscises (tongues) and may not be able to access nectar from flowers with long tubes
 - Flowers with long floral tubes can attract other pollinators with long tongues or beaks such as butterflies, moths, and hummingbirds

Power of Pollinators

Pollinator Plant Examples

- Milkweeds (*Asclepias* spp.) - tropical milkweed not recommended
- Tickseed (*Coreopsis* spp.)
- Beach Dune Sunflower (*Helianthus debilis*)
- Blazing Star (*Liatris* spp.)
- Black-eyed Susan (*Rudbeckia* spp.)
- Stokes' Aster (*Stokesia laevis*)
- Spotted Beebalm (*Monarda punctata*)
- Sage (*Salvia* spp.)
